

Request for Comments Draft Qualification Standards for Wildland Fire Management, 0456

Please provide your comments and suggestions within 30-days.

Note: As this is a new occupation, the draft shall be implemented upon issuance and used to qualify candidates for positions in this series.

Significant Considerations

1. This draft proposes establishing the Wildland Fire Management, 0456, Qualification Standard.
2. Federal employees covered by the General Schedule Classification System under Title 5, United States Code who work in the Wildland Fire Management, 0456, Series will be impacted by the proposed updates.
3. This standard was developed in alignment with OPM qualification standards for series previously covering Wildland Fire Management work and in conjunction with Lead Agencies.

Information We Need from Agencies with Covered Positions

Subject matter experts and human resources officials in agencies should answer the following questions about the draft qualification standards:

1. Is the education/training relevant? If not, what education/training/degree types or courses should be added? Are there any which should be deleted?
2. Is the level of education/training appropriate for positions in the series?
3. Are the certification/licensure requirements for positions in the series correct? If not, what certification/licensure is required?
4. Are there any other missing requirements or information?

How Do You Submit Comments?

In response to the requests outlined above, we would like to receive both:

- (a) Comments representing the agency's overall feedback, and
- (b) Representative comments from subject matter experts and subordinate locations/organizations.

Please send your electronic comments as an email attachment to fedclass@opm.gov within 30-days.

Please note: Each response must cover an entire agency. Therefore, departments and independent agencies must consolidate information from all of their components or bureaus before sending comments to OPM.
